Acrylic Blocks

Wholesale Prices
Jan '26

- Mirart only uses Premium Quality, Cast Acrylic to make Blocks
- Every edge is polished with diamond cutters on a machine which finishes the flat edges for optical clarity, thereby taking advantage of the unique characteristic of acrylic to 'bend light' and reflect light internally. That means you can see thru acrylic while also seeing reflections of the part being on display.

- USES: these blocks are perfect for showcasing a wide variety of items, including artifacts, collectables, memorabillia, toys, figurines, antiques, dolls, action figures, souveniers, models, statues, heirlooms, sculptures, and more. Whether in your home, office, retail store or museum, they add a touch of sophistication to any display.

- Mirart Products are Proudly MADE in the USA
- PACKAGING: Items include protective packaging to ensure a safe arrival to your location.
- QUALITY GUARANTEE: when you purchase a Mirart product, you purchase from the best. Your satisfacation is guaranteed.

Acrylic Blocks

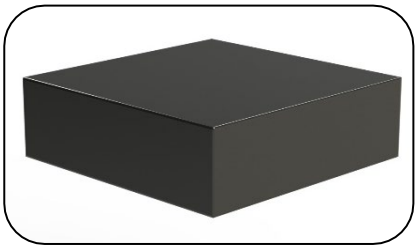

Wholesale Prices
Jan '26

- Frosting the outside surface of acrylic and then exposing the block to strong overhead light or LED light, makes the block appear to 'light up' or glow. A great effect when displaying unique pieces.

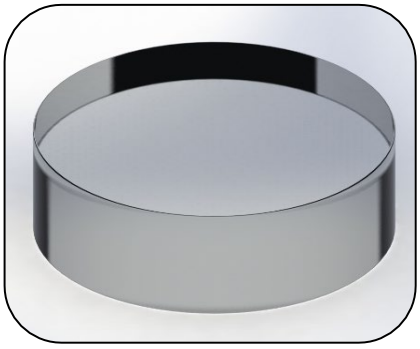

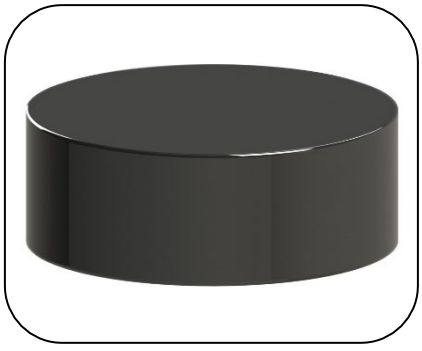

- GlassAlike® is a unique colored acrylic that we developed over 30 years ago. It appears to be glass, but does not have the 'breakability' of glass. Items displayed on it appear to be 'elegant', but without the 'danger' of using real glass to display your parts.

- Black squares offer you contrast with your part, while still having the beauty of a base under your part.

- Sometimes a product just needs a round base.
- These might include a perfume bottle or a figurine.
